Annex 1: Study plan

Annex 2: Module descriptions

§ 1 Scope of Application

These Study and Examination Regulations govern the content and qualification objectives as well as the structure and examinations of the Master Degree Program in Art. They apply in conjunction with the General Regulations for Bachelor and Master Degree Programs at Hochschule für Gestaltung Offenbach am Main (HfG), as amended last on March 06th, 2023.

§ 2 Academic Degree

Upon successful completion of the Master Degree Program in Art, HfG awards the academic degree “Master of Fine Arts” (M.F.A.) in Art or Art with larger theoretical component.

§ 3 Standard period of study

- (1) The standard period of study for the Master Degree Program in Art is four semesters.
- (2) The degree program amounts to 120 credit points (CP).
- (3) The Master Degree Program in Art can be studied on an informal, part-time basis upon application in accordance with the requirements of state law. Additional regulations are set in the Enrollment Statutes of HfG.

§ 4 Program’s Start

The Master Degree Program in Art starts only in the winter semester.

§ 5 Aims of the Master Degree Program in Art

Master Degree Program in Art qualifies students as professional artists and designers in corresponding professions. Against the backdrop of an art and cultural landscape which is both historically rooted and increasingly intermedial and transcultural, the Master students are enabled to distinguish themselves in dynamic professional profiles.

In the Master Degree Program in Art, students acquire the ability to work in an artistic/creative, technical, organized, and conceptual manner. They explore and try out artistic/design formats and content in all artistic teaching areas. The program can be studied in two options, as an M.F.A. in Art or as an M.F.A. in Art with larger theoretical

component. Students deepen their knowledge and skills in the art and design-related theory subjects at the Department of Art, with varying degrees of intensity depending on the program variant. In both variants, emphasis is placed on the processual, the interdisciplinary, and the interaction between theoretical/academic reflection and artistic practice. Likewise, social skills among students are basic elements of the intended personality development.

The course qualifies students to further develop and focus on their own positions and to implement artistic projects in a professional manner.

Students who are interested in obtaining a Ph.D. are advised to study the program variant with I. The requirements for a Ph.D. at HfG are governed by the corresponding doctoral regulations.

§ 6 Larger theoretical component

- (1) The prerequisite for the Master Degree Program in Art with a larger theoretical component is completion of the elective module THEORY⁺ as well as the required elective module MASTER'S THESIS WITH A LARGER THEORETICAL COMPONENT. For the theoretical Master's thesis, section 9, paragraph 3 applies.
- (2) If the study variant with a larger theoretical component is chosen, the topic, grade, and supervision of the theoretical final thesis are shown on the final certificate.

§ 7 Program Structure and Language

- (1) The teaching sessions in the Master Degree Program in Art are offered within the framework of modules. The study plan provides an overview (Annex 1). The module descriptions (Annex 2) provide further details on the course content and examinations. The program takes place primarily in projects.
- (2) The degree program, including the examinations, is conducted in German. In agreement with all parties involved, individual courses and examinations may be conducted in English.

§ 8 Elective Section

- (1) In the "elective section" students can choose courses from various elective modules, up to 51 CP depending on the program variant. Any remaining CP will be earned in the

elective module “free study”. Alternatively, students can gain all their credit points through their free study.

- (2) In the free study section, students are free to choose courses from within the framework of the specifications outlined in the module description. The aim here is the students advancement in their own artistic profile and the broadening of areas of competence according to personal interests.
- (3) Information about the courses to be taken and the CP to be acquired will be displayed in good time before the start of the semester at an appropriate place.
- (4) In the free study section, courses of the design department at HfG and courses offered at other German universities and abroad can also be attended (“free study”) to achieve the competence goals; in addition, interdisciplinary, extracurricular, and external events can be included in the elective section. In such cases, students must coordinate their list of planned events with the Examination Committee before starting the corresponding module. The CP allocation for the free study in the elective section is based on a CP catalog published on the department’s website.
- (5) Students may attend and combine the elective modules THEORY⁺, PRACTICE, and INTERDISCIPLINARY COLLABORATION AND MEDIATION multiple times as part of the appropriate course offerings. Students who wish to study the Master’s program with a larger theoretical component must complete the elective module THEORY⁺ (at least once).
- (6) The elective module INTERNSHIP can be taken once only in the elective segment.

§ 9 Final Module

- (1) The final module involves the conception, execution, and presentation of a superior, complex, independent, and professional artistic project within a specified framework. The Art seminar chosen for this purpose needs to be led by a professor with whom the students have already attended at least one Art seminar in the course of their studies and who has been teaching at HfG for at least two semesters. The Examination Committee may allow exceptions to this supervision requirement. The professor is the supervisor of the thesis and does the first grading. In the Master’s thesis, a second supervision by lecturers from practice is possible, which is carried out through individual qualified consultation and advice hours, as well as with advice during independent work in the workshop. Furthermore, additional supervision by teachers in

theory and/or from the Department of Design is possible. In the case of co-supervision, the first grade is decided in consultation with the co-supervising lecturers.

- (2) The final project can be prepared in a team or as group project in accordance with the General Regulations, section 21, paragraph 3. If a final project is created as a collaboration within the HfG and/or outside the HfG, its framework conditions must be agreed upon with the examiners and the Examination Committee before registration.
- (3) The second assessment of the thesis is carried out by an Exam Board consisting of at least two additional lecturers. For this purpose, students may approach suitable professors, lecturers for special tasks, and assistant professors active in teaching at the Department of Art and, where a connection to the project exists, at the Department of Design. In cases of doubt regarding the composition of the Exam Board, the Examination Committee will decide.
- (4) In the study program with a larger theoretical component, a theoretical Master Thesis is written before the artistic Master's project. It is supervised and graded by a professor whose seminars the students have attended, at least one in the compulsory module THEORY and one in the elective module THEORY⁺. A second supervisor may be involved. The second grading is done by a theory lecturer (professor or assistant professor) chosen by the students.
- (5) For admission to the final module, proof of at least 90 CP is required, including any PRACTICE modules chosen as part of the elective section. If a second supervisor for the Master Thesis in practice is desired, a consultation session is held with the supervisor from practice to examine the corresponding knowledge, skills, and abilities that must have been acquired before registration for the Master Thesis and, if necessary, made up for in the elective section.
- (6) The final certificate bears the date of the presentation and is signed by the chairperson of the Examination Committee. It states the topic of the final thesis as well as the names of the first and, if applicable, a second supervisor with their respective teaching area. For the Master's degree with a larger theoretical component, the information on the theoretical Master Thesis is added analogously.

§ 10 Module Examinations and Coursework

- (1) Registration for module examinations in theory (required elective module THEORY+ in the program variant of Art with a larger theore) takes place with the lecturer and usually upon the issuing of a topic for the written thesis.
- (2) Registration for the Master Project and, if applicable (in the program variant with a larger theoretical component), for the theoretical part of the Master Thesis takes place with the specification of the project or topic to the Examination Committee and is usually possible twice a year (beginning in the summer semester of 2024). The exact dates are announced on the department's website. At the time of registration for the Master's examination, students must be matriculated.
- (3) For repetitions of module examinations and coursework, section 19 of the General Regulations shall apply.

§ 11 Examination Results, Formation of the Overall Grade

- (1) The following grades are to be used for the examination results:

1 = very good	an excellent performance
2 = good	a performance that is significantly above the average requirements
3 = satisfactory	a performance that meets average requirements
4 = sufficient	a performance that still meets the requirements despite its deficiencies
5 = insufficient	a performance that does not meet the requirements due to significant deficiencies

- (2) For differentiated assessment of the examination , individual grades may be increased or decreased by 0.3 to intermediary grades; the grades 0.7, 4.3, 4.7, and 5.3 are excluded here.
- (3) he overall grade for the Master's degree program in Art is calculated as follows for the program variant M.F.A. Art:

Module FINAL THESIS	100 %
---------------------	-------

for the program variant M.F.A. in Art with a larger theoretical component:

Elective module THEORY+	30%
-------------------------	-----

§ 12 Study Advice and Requirements for the Course of Studies

- (1) An orientation event is held at the beginning of the degree program.

The professors also provide ongoing advice on the structure and implementation of the study program during their office hours. In addition, all lecturers provide advice on the content of their teaching. The management of the Examination Committee also provides advice on administrative matters of the degree program.

- (2) Pursuant to section 7 of the General Regulations, the study program is planned in such a way that 30 CP per semester are awarded for full-time study within a standard period of study.
- (3) Students must attend at least one course per semester.
- (4) Students who have not attended any courses for two semesters in a row must attend a course advisory session held by the Examination Committee or a person designated by the Examination Committee in the next semester.
- (5) Students who have again failed to attend courses in the two following semesters without giving reasons may be exmatriculated.
- (6) For determination of the delay in study pursuant to (4) and (5), section 18 of the General Regulations on compensation for disadvantages must be taken into account.
- (7) If students give reasons for the delay pursuant to (4) or (5) in the course advisory session that are not covered by the compensation for disadvantages, the Examination Committee may grant an extension of the deadline in cases of hardship.

§ 13 Additional Modules and Allocation of Places

- (1) Students may attend additional courses/modules ("overflow account") subject to available places. These can be listed in a transcript of records. In the case of parallel attendance of alternative courses/modules, the students determine at the beginning of the semester, in connection with the registration for the two courses, what is to be recorded in the curriculum and what in the overflow account.
- (2) In the course catalog, regulations can be made for access to individual courses with limited (work)places. Students who want to specialize in the corresponding subject area through the course and possibly aim for a thesis in it can be admitted with priority.

§ 14 Compensation for Disadvantages

For compensation for disadvantages, section 18 of the General Regulations shall apply.

§ 15 Publications by the Department

The Department of Art has the right to inform the public in a suitable form (e.g., exhibitions, publications – including in electronic form) about research projects and theses by students. The exploitation rights of the students remain unaffected.

§ 16 Entry Into Force

These Study and Examination Regulations come into force on the day after their publication on the website of HfG and apply to all students who start their Master's degree in the winter semester of 2022/23.

COMPULSORY MODULES _____	2
ELECTIVE SECTION _____	4
MASTER'S THESIS _____	11

COMPULSORY MODULES

ART (FINE/APPLIED)			
Module Code MFA-Kunst-K	Workload 900 h, made up of • 135 to 180 h attendance • 720 to 765 h individual work	CP 30	Duration 3 semesters
Learning Objectives			
<ul style="list-style-type: none"> • Mastery of individual representational methods, independent artistic work processes, techniques, and theories • Ability to think and work conceptually and to engage self-critically throughout the artistic process • Advanced understanding of art and cultural-historical contexts 			
Content			
<ul style="list-style-type: none"> • Focused work on complex free or applied projects • Specialization of technical knowledge • Experimentation with complex creative strategies • Recognizing, formulating, and developing unique characteristic qualities in art • Extensive examination of historical and contemporary artistic positions and strategies • Acquisition of complex subject specifics in the art and cultural-historical context and an understanding of one's own critical positioning in that context • Exploration, development, and presentation of one's own complex formal as well as thematic concerns • Further development of one's own expression and style • Realization of a project (if necessary, with partners outside of the university) in process-based learning from conception to presentation in discourse with teachers and fellow students • Practicing interrelation in cooperative structures, acquisition of networking skills • Positioning of projects in public processes, presentations, and exhibitions 			
Courses			
3 Art seminars with individual discussions, each 3-4 SHW/10 CP			
Notes			
The Art seminars are a mixture of joint work, group discourse (3-4 SHW) and independent studio work that accompanies the seminar. When the classroom time is longer, the proportion of private study is lower, since the corresponding amount of work is done within the framework of the seminar.			
Expectations and Coursework			
Regular participation, individual artistic work with presentation in the Art seminars			
Assessment			
None			
Prerequisites			
Generally none. In the course catalog, supplementary prerequisites may be defined in individual cases, specific to the teaching area.

ELECTIVE SECTION

In the elective section of up to 51 CP, depending on the program variant, students can choose from various elective modules.

Students may attend and combine the elective modules THEORY⁺, PRACTICE, and INTERDISCIPLINARY COLLABORATION AND MEDIATION multiple times as part of the appropriate course offerings.

Students who wish to study the master's program with a larger theoretical component must complete the elective module THEORY⁺ (at least once).

The elective module for the internship can be taken once only.

Any remaining CP will be earned in the elective module "Free Study". Alternatively, students can gain all their credit points in the Free Study module.

ELECTIVE SECTION – THEORY⁺				
Module Code	Workload	CP	Duration	CM/REM
MFA-Kunst-WB-Th	450 h, made up of <ul style="list-style-type: none"> • 90 h attendance • 360 h individual work 	15	3 semesters	Elective module in the elective section
Learning Objectives				
<ul style="list-style-type: none"> • Theoretical/academic handling of phenomena and concerns in art, design, philosophy, sociology, media, and culture • Ability to operate in an academic humanities context with regard to an artistic education and artistic profession 				
Content				
<ul style="list-style-type: none"> • Special topics, e.g., from philosophy and aesthetics, art history, theory of perception, sociology, and media theory. Students must attend seminars in at least two different areas. One of the seminars must be taken with the person who will be supervising the master's thesis. 				
Courses				
3 seminars or lectures/seminars, each 2 SHW				
Expectations and Coursework				
Regular active participation, comprehensive reading of assigned texts				
Assessment				
Cumulative module examinations consisting of three written papers (written examinations or coursework assignments of at least 15 pages) in the three seminars. All partial examinations must be passed and count equally toward the module grade.				
Prerequisites				
None

Notes

If a second supervision in practice is desired for the master's thesis, proof of basic knowledge corresponding to the correlating content of the practical modules in the art bachelor's degree program at the Offenbach am Main, University of Art and Design is a prerequisite. If this knowledge cannot be demonstrated through a bachelor's degree or competency acquired outside of the university, completion of the required elective module PRACTICE in the elective section in the corresponding teaching area is a prerequisite for the second supervision in practice.

The practical courses in the workshops usually last 3 SHW; for courses in which the use of the university's own technical equipment (machines, devices, tools, etc.) is required, up to 7 SHW. Where the classroom time is longer, the proportion of private study is lower, since the corresponding amount of work is done within the framework of the practical course. A total of 5 CP is awarded in this module for the combination of independent work in the workshop and qualified exchange with the lecturers. As a rule, 0.5 CP are allocated for attending a discussion and advisory session and for preparation and follow-up work. Students decide for themselves how many discussions and advisory sessions they attend.

ELECTIVE SECTION – INTERDISCIPLINARY COLLABORATION AND MEDIATION				
Module Code	Workload	CP	Duration	CM/REM
MFA-Kunst-WB-IKV	300-600h	10-20	1 semester	Elective module in the elective section
<p>Learning Objectives Students delve deeper into their own expressive forms, and expand their areas of competence in accordance with their personal interests:</p> <ul style="list-style-type: none"> • Advanced skills and knowledge in artistic and practical fields related to theoretical/scientific areas • Conceptual content-related and organizational skills in the public presentation of one’s own and other people’s work • Ability to contribute to and position oneself in various forms of trans-disciplinary discourse 				
<p>Content Depending on student selection, appropriate participation in/leadership of e.g.</p> <ul style="list-style-type: none"> • “Convergence” projects at the university • Interdisciplinary conferences or symposia at the university • Festivals, exhibitions, etc. at the university or beyond • Interdisciplinary and collaborative projects • Curatorial projects 				
<p>Courses Participation in/collaboration with exhibitions/events 10-20 CP</p> <p>This module may include credit for preparation, as well as concept and organizational work on interdisciplinary collaborative events and exhibitions.</p>				
<p>Expectations and Coursework Before starting the module, students coordinate their planned participation with the instructor supervising the project. (S)he will determine suitable correlating coursework, e.g., artistic project, lecture, publication, or documentation.</p>

MASTER'S THESIS WITH A LARGER THEORETICAL COMPONENT

Module Code MFA-Kunst-MA- Th	Workload 990 h, made up of <ul style="list-style-type: none"> • 75 to 90 h attendance • 540 to 555 h individual work 	CP 33	Duration 1 semester	Compulsory/Required Required
---	--	-----------------	-------------------------------	--

Learning Objectives

- Design confidence and professional practice, individual presentation skills, at a high technical level
- Ability to work independently in a creative capacity
- Ability to think conceptually with confidence
- The formation of one's own visual language and approach
- Ability to critically engage throughout the creative process
- Strong knowledge of artistic and cultural contexts, comprehensive subject-specific knowledge of artistic practice
- Ability to argue with confidence and knowledge on theoretical-scientific aspects of art and design
- Independent writing of a long theoretical paper related to a topic in art and design from a humanities or cultural studies perspective

Content

In the fourth semester, students complete their master's degree in the subject area of their choice.

The master's thesis is composed cumulatively of a highly demanding and complex artistic master's project that meets professional standards and a written theoretical master's thesis on a topic of the student's own choosing which may or may not be related to the project. This work demonstrates the competencies developed by the student over their course of study.

The project is presented, discussed, and evaluated in a professional manner to the university public.

If the degree with a larger theoretical component is sought, this module must be taken for the master's thesis.

Courses

Master colloquium theory 3 CP

Individual discussion (design/theory/workshop)

Master's thesis, 20 CP, of which up to 10 CP supervision in practice/in workshops
up to 2 CP supervision in theory

Theoretical master's thesis 10 CP

Expectations and Coursework

Active and regular participation in the master's colloquium for theory; presentation of one's own work; resonance and co-moderation where appropriate

Assessment

Cumulative module examinations will evaluate the conception, execution, and presentation of a demanding, complex, independent, artistic project within a specified framework as well as the theoretical master's thesis, of at least 80,000 characters. Both partial examinations must be passed. The artistic project counts for 2/3 of the module grade, the theoretical master's thesis for 1/3.

For the project, in addition to the individual thesis, a team or group project is possible in accordance with section 9 of the Study Regulations.

The master's project can only be started after the theoretical master's thesis has been passed.

Prerequisites

The prerequisite for the master's thesis with larger theoretical component is the previous completion of the required elective module THEORY+. In this case, the theoretical master's thesis is supervised and graded by an instructor whose seminars the student has attended at least one in the compulsory module THEORY and one in the elective module THEORY+. This will be the person with whom the student attends the master's colloquium for theory.

Prerequisite for participation in the master's project is participation in at least one Art seminar of the main supervisor of the master's project in the module ART(FINE/APPLIED) as well as the passing of the theoretical master's thesis.

In the course catalog, supplementary prerequisites may be defined in individual cases, specific to the subject.

If second supervision in practice is desired, a further prerequisite is proof of basic knowledge that corresponds to the learning content of the practical modules of the bachelor's degree program in art at the Offenbach am Main University of Art and Design. If this knowledge cannot be demonstrated through a bachelor's degree or competency acquired outside of the university, completion of the elective module PRACTICE in the elective section in the corresponding teaching area is a prerequisite for the second supervision in practice.
